

MUHAMMED MUAVVIZ

Software Developer

+91 9342310511 | muhammedmuavviz@gmail.com | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Full-stack developer with expertise in modern web and mobile application development. Proficient in React.js, Next.js, Flutter, and Python with proven ability to architect and deliver production-grade applications across web and mobile platforms. Strong foundation in database design, RESTful API development, and responsive UI implementation. Demonstrated capability to work independently on client projects and contribute effectively in team environments. Currently expanding expertise in enterprise-scale web applications and advanced animation frameworks.

TECHNICAL SKILLS

Languages & Core	Python, JavaScript (ES6+), TypeScript, SQL, Dart
Frontend Technologies	React.js, Next.js, Vite, Tailwind CSS, Framer Motion, Three.js, HTML5, CSS3, Responsive UI Design
Mobile Development	Flutter, Dart, Firebase (Auth/Firestore), Cross-platform Development
Backend Development	Python (Flask, FastAPI), REST API Design, API Integration, RESTful Architecture, Webhook Handling
Databases & Data	MySQL, PostgreSQL, SQL Query Optimization, Database Design, Data Persistence
DevOps & Tools	Git, GitHub, Docker, Version Control Workflows, Deployment Pipelines
UI/UX Design Patterns	Component-Based Architecture, State Management, Animation Principles, Interactive Interfaces, Performance Optimization

PROFESSIONAL EXPERIENCE

Junior Software Developer

Delq Solutions, Chennai

October 2025 – May 2026

- Developed a comprehensive corporate website using React.js and modern tools (Vite, Tailwind CSS 4, Framer Motion). Implemented UI patterns including smooth animations, scroll-triggered reveals, and interactive 3D elements using Three.js/React Three Fiber.
- Built a full-featured admin panel enabling content management for blogs, careers listings, and dynamic page sections. Implemented role-based access control and persistent data management with secure authentication workflows.
- Developed backend infrastructure using FastAPI (Python), designing RESTful endpoints for content delivery, file uploads, user management, and authentication. Deployed services using Docker for consistency across environments.
- Developed a feature-rich Flutter mobile application successfully published to both iOS App Store and Google Play Store. Built responsive UI components, implemented state management using Riverpod, integrated Firebase for authentication and real-time data synchronization.
- Managed application lifecycle from initial development through production release. Optimized performance, implemented caching strategies, and established monitoring for production reliability.
- Collaborated with product and technical teams on architecture decisions, code reviews, and requirement translation into scalable features.

Software Intern

Delq Solutions, Chennai

February 2025 – May 2025

- Implemented frontend features using React.js with clean component architecture and proper state management patterns.
- Contributed to backend development with Python and SQL, focusing on data handling, API design, and database optimization.
- Collaborated with senior developers using Git workflows and version control best practices.

EDUCATION

Master of Computer Applications (MCA)

SRM Institute of Science and Technology, Chennai
CGPA: 9.2

2024 – 2026

Bachelor of Computer Applications (BCA)

The New College, Chennai
CGPA: 8.0

2021 – 2024

KEY PROJECTS

WQTC Mobile Application

Cross-Platform Educational App

- Engineered feature-rich educational mobile application built with Flutter, successfully published on iOS App Store and Google Play Store.
- Implemented core features including interactive course modules, progress tracking, prayer time calculations, and directional guidance systems.
- Integrated Firebase for user authentication, cloud data synchronization, and real-time feature delivery across platforms.
- Designed responsive layouts with adaptive UI patterns for various screen sizes and implemented state management using Riverpod pattern.
- Technologies: Flutter, Dart, REST APIs, Riverpod

HealthBridge

Full-Stack Healthcare Platform

- Developed comprehensive healthcare platform with symptom-based appointment scheduling and doctor-patient matching system.
- Built backend using Python and Flask with RESTful APIs handling user inputs, appointment logic, and data processing workflows.
- Designed SQL database schema for efficient storage and retrieval of user profiles, appointments, and medical history.
- Created responsive React.js frontend with form handling, validation, and interactive patient interfaces.
- Technologies: Python, Flask, SQL, React.js, REST APIs

CORE COMPETENCIES

- Full-Stack Web Application Development
- Mobile Application Architecture (Flutter)
- RESTful API Design & Implementation
- Database Design & Optimization
- Frontend UI/UX Pattern Implementation
- Responsive & Adaptive Design
- State Management & Architecture
- Code Quality & Engineering Practices
- Deployment & DevOps Workflows
- Problem Solving & Debugging

CERTIFICATIONS & ACHIEVEMENTS

- AWS Cloud Practitioner Certified
- AWS Re/Start Graduate
- HackerRank Python Certification
- Successfully deployed production applications to major app stores (iOS, Android)
